

Implement a data-driven approach and save 80% of effort to build VRA maps

Benefit from an all-in-one cloud platform collecting your farm data

Create a field productivity profile and reliable VRA maps for agronomic operations

Collect data insights to benchmark fields

How it works

GeoPard platform connects your primary data

GeoPard structures primary & geodata and creates a 360-degree field profile

Explore impactful data results & dive into field performance

“GeoPard’s platform not only helps us to visualize data but also provides tools to analyze insights. This results in our ability to create solutions & write prescriptions which agronomists and farmers can act on.”

Steve Larocque
Beyond Agronomy owner &
FarmVu President
